

# Explore the possibilities!

Want a new way to deliver real-time and on-demand educational, training, and professional development programs? Need an innovative tool for meeting with colleagues across the state or nation?

Consider the power, flexibility, and convenience of IHETS Interactive. With two-way interactive video and audio, text chat, application sharing, and more, you can reach your audiences wherever they are.

Built using Breeze Meeting, Adobe's Web conferencing platform, IHETS Interactive offers a robust suite of tools for real-time teaching and learning, with features like an electronic whiteboard, annotated PowerPoint presentations, quizzing, and polling.

IHETS Interactive can also help you conduct business and move forward with important projects quickly and efficiently. Whether your participants are across town, on different coasts, or around the globe, you can collaborate, make decisions, solve problems, and reach consensus from the convenience of your office desktop.

How can you use IHETS Interactive to increase educational access and administrative efficiency? Get creative and put it to the test! Consult your campus scheduling contact or our scheduling policies, then request a test account.

Support for this fully managed service is provided from 8 a.m. until 10 p.m. so using IHETS Interactive won't stretch the resources of your campus technical support staff. Live one-on-one and group training sessions are available and user documentation is available on our Web site.
